SUMMARY

Software engineer turned application consultant with hands-on experience building production-grade systems across full-stack development, AI, and cloud infrastructure. At Capgemini, I work on an enterprise Dialogflow CX conversational AI platform, owning ticket delivery, QA analysis, and technical documentation across cross-functional teams. Dual AWS-certified and actively pursuing Google Associate Cloud Engineer.

EXPERIENCE

Associate Application Consultant · *Capgemini* Feb 2025 – Present

- Took end-to-end ownership of a Dialogflow CX tickets for an enterprise CCaaS platform traced parameter lifecycle across flows and pages, documented solution options with risk analysis, presented the design for approval, and supported backend Cloud Run execution and test case validation, completing delivery within a 2-week turnaround.
- Audited 10+ live call scenarios in Dialogflow CX, developed a structured QA tracker documenting expected vs. observed routing, identified latency-prone steps, webhook failure points, and mismatched flow/page names, and delivered a pitfall analysis with standardization recommendations to the technical lead.
- Produced internal technical documentation and Visio process maps for conversational flow behavior, capturing decision points, webhook hand-offs, and edge cases to serve as a repeatable reference for the delivery team.

Software Engineer · *H2 Techno World* Sep 2024 – May 2025

- Engineered a full-stack inventory and order management platform for SMBs using React.js, FastAPI, and MySQL with multi-level role-based access control, increasing task completion efficiency by 35% across all device types.
- Unified fragmented operational data into a centralized audit pipeline, improving data accuracy by 90% and enabling predictive insights that reduced manual review cycles by over 60%.
- Containerized microservices with Docker and configured GitHub Actions CI/CD pipelines targeting AWS EC2, cutting deployment time from 2 days to under 5 hours and sustaining 99.9% uptime across all environments.

Full-Stack Developer Intern · *Crown Software* Dec 2022 – May 2023

- Optimized SQL queries and backend APIs for the MDHostel platform, reducing average query response time by ~40% across student management modules including attendance, complaints, and leave processing; served as the technical point of contact for REST API tasks across a team of 6, reviewing, delegating, and unblocking work as needed.
- Developed and launched 3 new modules (Room Allocation, Complaint Tracking, and Meal Management) with secure role-based permissions and real-time data sync, cutting administrative overhead by 30%.
- Collaborated across Agile sprints with a team of 6 using GitHub Projects for planning, code review, and issue tracking, achieving a 90% on-time sprint delivery rate throughout the engagement.

PROJECTS

Multi-Agent Conversational AI System · *Python · FastAPI · React.js · PostgreSQL · Cohere · FAISS* Jul 2025

- Architected a full-stack multi-agent AI platform integrating Retrieval-Augmented Generation (RAG), FAISS vector search, and Cohere LLM, achieving a 20% improvement in response relevance through memory-aware adaptive dialogue.
- Implemented a RESTful FastAPI backend supporting chat, CRM management, and document ingestion pipelines with reranking and contextual memory modules, reducing response latency by 15% across 1,000+ stored user interactions.

EDUCATION

M.S. Computer Science · New Jersey Institute of Technology · GPA: 3.9/4.0 Jan 2024 – May 2025

B.E. Computer Engineering · Charusat University · GPA: 9.75/10 · Top 5% of Class Jul 2019 – May 2023

SKILLS & CERTIFICATIONS

Languages: Python, Java, JavaScript, TypeScript, PHP, SQL, C++

Frameworks & Databases: React.js, Next.js, FastAPI, Spring Boot, Node.js, Laravel · PostgreSQL, MySQL, MongoDB, BigQuery

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, SQS, SNS, Elastic Beanstalk), GCP (Dialogflow CX, Cloud Logging, Vertex AI), Docker, GitHub Actions

AI & Tools: RAG, FAISS, Cohere LLM, Vertex AI, Cursor, Postman, PyTest, JIRA, REST APIs

Certifications: AWS Cloud Practitioner · AWS Developer – Associate · Google Associate Cloud Engineer (in progress)
