

# MANAN SHAH

Associate Application Consultant

+1 (551) 328-8691 | mananshah2602@gmail.com | LinkedIn | GitHub | Portfolio

## SUMMARY

Software engineer turned application consultant, building production-grade AI and cloud systems for enterprise clients. At Capgemini, I work on a Customer Care as a Service platform powered by Dialogflow CX, BigQuery, and Google Cloud owning delivery end-to-end across engineering and client-facing responsibilities. Dual AWS-certified and actively pursuing Google Associate Cloud Engineer.

## EXPERIENCE

**Associate Application Consultant** · *Capgemini* Jun 2025 – Present

- Architect and deliver cloud-native, AI-driven solutions for an enterprise Customer Care as a Service platform, integrating Dialogflow CX conversational flows, Spring Boot microservices, BigQuery analytics, Cloud Logging, and MongoDB — handling **1 monthly customer interactions** at scale.
- Own the full technical lifecycle from infrastructure design and AI integration through to client-facing delivery; independently translate complex architectures into executive-ready business narratives that drive stakeholder decisions.
- Lead sprint ceremonies and cross-functional team collaborations, evolving from pure engineering into end-to-end consulting ownership with measurable delivery accountability.

**Software Engineer** · *H2 Techno World* Sep 2024 – May 2025

- Designed and shipped a production-ready full-stack inventory and order management platform for SMBs using React.js, FastAPI, and MySQL with multi-level role-based access control, achieving a 35% improvement in task completion efficiency across device types.
- Consolidated fragmented operational data into a unified audit pipeline, improving data accuracy by 90% and surfacing predictive insights that eliminated the majority of manual review cycles.
- Containerized microservices with Docker and established GitHub Actions CI/CD pipelines for AWS EC2, compressing deployment cycles from 2 days to under 5 hours while maintaining 99.9% uptime.

**Full-Stack Developer Intern** · *Crown Software* Dec 2022 – May 2023

- Optimized SQL queries and backend APIs for the MDHostel platform, reducing average query response time by ~40% across student management modules including attendance, complaints, and leave processing.
- Delivered Room Allocation, Complaint Tracking, and Meal Management modules with secure role-based permissions and reliable data synchronization, cutting administrative overhead by 30%.
- Collaborated across Agile sprints with a team of 6 using GitHub Projects for planning, code review, and issue tracking — achieving a 90% on-time delivery rate throughout the engagement.

## PROJECTS

**Multi-Agent Conversational AI System** · *Python · FastAPI · React.js · PostgreSQL · Cohere · FAISS* Jul 2025

- Built a full-stack multi-agent AI system integrating Retrieval-Augmented Generation, FAISS semantic search, and Cohere LLM for memory-aware, contextually adaptive dialogue — delivering a 20% improvement in response relevance.
- Implemented a RESTful FastAPI backend handling chat, CRM, and document ingestion with logging, reranking, and memory modules, reducing response latency by 15% while supporting over 1,000 stored interactions.

## EDUCATION

**M.S. Computer Science** · New Jersey Institute of Technology · GPA: 3.9/4.0 Jan 2024 – May 2025

**B.E. Computer Engineering** · Charusat University · GPA: 9.75/10 · Top 5% of Class Jul 2019 – May 2023

## SKILLS & CERTIFICATIONS

**Languages:** Python, Java, JavaScript, TypeScript, PHP, SQL, C++

**Frameworks & Databases:** React.js, Next.js, FastAPI, Spring Boot, Node.js, Laravel · PostgreSQL, MySQL, MongoDB, BigQuery

**Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda, SQS, SNS, Elastic Beanstalk), GCP (Dialogflow CX, Cloud Logging), Docker, GitHub Actions

**AI & Tools:** RAG, FAISS, Cohere LLM, Vertex AI, Cursor, Postman, PyTest, JIRA, REST APIs

**Certifications:** AWS Cloud Practitioner · AWS Developer – Associate · Google Associate Cloud Engineer (in progress)
